

PEN-A-TRATE™ ECO

ENHANCEMENT

Nonionic Surfactant, Drift Reduction Agent & Deposition Aid

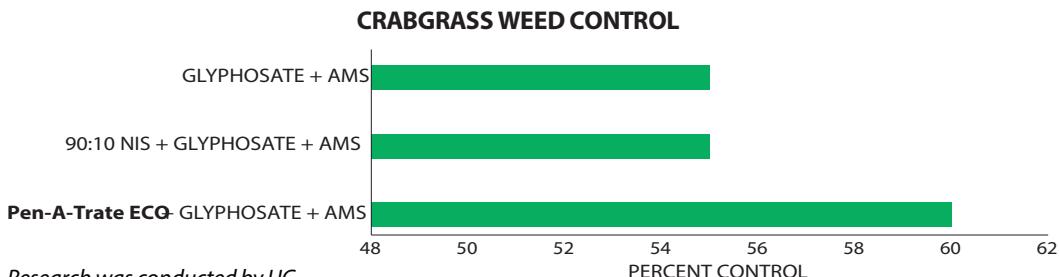

Pen-A-Trate ECO is an OMRI-certified, nonionic surfactant and so much more. Turf, ornamental, and aquatics professionals now have an option that optimizes the performance of tank mix partners in environmentally sensitive areas.

Pen-A-Trate ECO's unique formulation maximizes performance with drift reduction technology that ensures spray applications stay on target, maximizing droplet spread and retention. The environmentally friendly formulation allows use in and around aquatic areas. The high surfactant load also provides improved performance for spray mixes used on turf and ornamentals.

Features & Benefits

- Reduces small droplet sizes that contribute to drift
- Increased spray droplet retention keeps more product on the plant
- Enhanced droplet spread optimizes tank mix partner performance
- Environmentally friendly formulation provides flexibility, and is approved for aquatic use
- OMRI-listed for peace of mind around water, homes and public greenspaces

Research was conducted by UC Cooperative Extension, Fresno County.

The addition of Pen-A-Trate ECO provides increased control of troublesome, weedy grass species when compared to the addition of a competitive nonionic surfactant.

USE RATES:

1-4 pints (0.47-1.89 L) per 100 gallons
(378.54 L) of spray solution (0.125-0.5% v/v)

Please check with your Aquatrols distributor for available pack sizes.

See label for complete usage information.
