DISPATCH®
SPRAYABLE

HYDRATION

Control Your Water, Control Your Results

Whether your course is under constant water use restrictions or you have plenty of water available, the real challenge is getting water to go where you need it. The amount of water you apply doesn't matter if your turf can't access it.

Dispatch Sprayable increases the penetration and infiltration of irrigation or rainfall, making it more readily available for plant uptake. Because Dispatch Sprayable delivers water more efficiently into the soil, photosynthesis and other turf metabolic functions can be maintained with less water.

The result is increased turf performance even under heat and moisture stress, and more dependable plant growth and playability coursewide.

Features and Benefits:

- Improves infiltration and penetration of irrigation water & rainfall
- Reduces water usage by 25-50% without sacrificing turf quality
- Increases photosynthesis in plants as well as other metabolic functions
- Promotes overall plant health for better disease tolerance
- Low application rates allowing for efficent large acre coverage

Please check with your Aquatrols distributor for available pack sizes.

DISPATCH® SPRAYABLE

HYDRATION

Dispatch Sprayable is specifically engineered to enhance water penetration "wall-to-wall." This patented, synergistic blend of block copolymer and alkyl polyglycoside surfactants gives you better water penetration, improving irrigation efficiency coursewide without great expense or major capital inputs.

Dispatch Sprayable - Key Features	
Consistent playing surface for better playability	Reduces water usage by 25-50% without sacrificing turf quality
Reduces surface run-off by as much as 19.2% on slopes. This reduces the loss of costly water-soluble chemicals as well as water	Increases photosynthesis in plants as well as other metabolic functions on less water
Better photosynthesis = better turf growth	Makes a little water go a long way
Improves irrigation efficiency by 30-50%	Increases overall plant health for better disease tolerance

Directions for Use	
WHAT IT DOES:	Dispatch Sprayable improves the infiltration and penetration of applied irrigation water and rainfall.
WHERE TO USE:	Dispatch Sprayable is recommended for use on fine turfgrasses such as those found on golf courses, athletic fields, and other highly maintained areas.
APPLICATION RATES AND FREQUENCY OPTIONS:	**Once a week:** Spray 8 ounces per acre (0.58 litres per hectare) **Every two weeks:** Spray 16 ounces per acre (1.16 litres per hectare) **Every three weeks:** Spray 24 ounces per acre (1.75 litres per hectare) **Dispatch Sprayable does not need to be watered in following application. Irrigate before next mowing or leave baskets off.**
TANK MIXING:	For one time application with soil directed chemicals, apply 16 ounces per acre (1.16 litres per hectare). Dispatch Sprayable is compatible with most turf chemicals. Prior to application, evaluate the tank mix for compatibility and apply to a small area to determine the effect on turf quality.

See label for complete usage information.
