

Edge to Edge Uniformity

It's no surprise that Revolution is trusted by so many turf professionals around the world. Soil surfactant technology that goes beyond water repellency issues, providing comprehensive water management and plant health benefits as well.

Revolution's patented formulation creates a thin continuous film of water in the soil profile, balancing air-to-water ratios and increasing the performance of turf under stress.

Features and Benefits:

- Revolutionary surfactant technology
- Exceptional horizontal & vertical moisture distribution
- Enhances efficiency of other tank mix inputs
- Edge to edge playing surface uniformity
- Optimum balance of air & water in the root zone
- Reduction of wilt and drought stress

Application Recommendations:

- Revolution must be applied at least one month prior to the anticipated onset of stress conditions in your area.
- Revolution must be used as part of an ongoing management program beginning prior to and continuing through stress periods.

USE RATES:

Monthly Application

Apply Revolution at 6 oz/1000 ft² (190 mL/100 m²).

Biweekly Application

Following an initial application of 6oz/1000ft² (190mL/100 m²), Revolution can be applied biweekly at 3 oz/1000 ft² (95 mL/100m²).

See label for complete usage information.
