

ENHANCEMENT

Turf and Ornamental Pigment

Envy is a combination of pigments and spray adjuvants labeled for application to turf, trees or shrubs. Envy may be used to improve color, mask injury or discoloration and improve the coverage of spray droplets on the leaf blade.

What Makes it Better:

- Natural green color.
- Temperature-stable formulation.
- Superior coverage.
- Broad label recommendations.

Features & Benefits

- Natural green color – appealing to players and customers
- Broad use recommendations – flexible
- Precision adjuvant technologies – improved product and tank mix partner coverage
- Stable formulation – convenient and easy to use

USE RATES:

- Turf – 16 ounces per acre, applied in 50 gallons of water
- Trees & shrubs – 16 ounces per 50 gallons of water, applied to achieve leaf coverage

See label for complete usage information.

Please check with your Aquatrols distributor for available pack sizes.
