

HYDRATION

## Rapid Recovery for Stressed Turf

Aqueduct is a rapid recovery soil surfactant that is specifically designed to quickly alleviate localized dry spot. It can also be used as a pre-treatment tool to correct problem areas on turf before starting a regular preventative soil surfactant program.

Aqueduct moves water deeply into problem areas, reducing water repellency and restoring the rootzone's ability to regain optimum moisture levels. In doing so, Aqueduct quickly reduces turf wilt and promotes recovery of stressed turf faster than other products on the market.

### Features & Benefits

- Specifically designed to treat localized dry spot
- Restores rootzones to optimum moisture levels
- Moves water deep into problem areas
- Quickly reduces turf wilt

### USE RATES:

Apply 8 fl oz/1000 ft<sup>2</sup> in 1 gallon of water.

Reapply at 4-8 fl oz/1000 ft<sup>2</sup> in 1 gallon of water  
on a weekly basis until problem is alleviated.

*See label for complete usage information.*

Please check with your Aquatrols distributor for available pack sizes.

## Aqueduct Promotes Rapid Recovery from Localized Dry Spot

Localized dry spot on the surface can signal water repellency issues deep in the rootzone. By applying Aqueduct on stressed areas, turf managers can quickly reverse these water movement issues at and below the soil surface.

Like all Aquatrols Company products, Aqueduct has been tested and proven in the field by independent researchers and turf managers worldwide. The photos were taken less than two weeks apart in Springboro, Ohio. As you can see, the use of Aqueduct resulted in rapid recovery from severe localized dry spot.

## Reduce Water Repellency Quickly

Soil samples collected from treated and untreated areas show that Aqueduct quickly and significantly reduces water repellency, the leading cause of localized dry spot (LDS). By speeding the infiltration of water, Aqueduct promotes fast recovery of stressed turf.

Whether you're faced with LDS, wet spots, or any other water movement problems on your turf, Aqueduct is the fast, effective tool you can depend on for rapid recovery.

## Aqueduct Speeds Water Penetration
