

**HYDRATION**

## Hydration and Infiltration

You work hard to provide great playing surfaces for your customers. Managing water in the root zone is important to your efforts and sometimes a touchup is all that is needed. Vivax 10G is a combination of four surfactant technologies on an eco-friendly carrier, designed to manage water across a wide range of soils and turf types. It is ideal for applications on golf courses and athletic fields, especially where spraying is difficult.

### What Makes It Better:

- Manage water across a wide range of soils and turf types
- Effective in programs that increase microbial populations
- Moves irrigation or rainwater off the playing surface and throughout the soil
- Does not require irrigation immediately after application

### Features & Benefits:

- Contains four surfactant technologies—effective across a wide range of conditions
- Reduces surface tension—less run-off and wasted water
- Provides greater soil solubility—improved turf quality and irrigation efficiency
- Resists microbial breakdown—ideal for use in programs that support soil microbial populations
- Uniform granular formulation—easy to apply

### APPLICATION INTERVAL

Apply Vivax 10G every 21 to 30 days

### USE RATES:

Apply 3.5 pounds (1.6 kg) of Vivax 10G per 1,000 sq. ft. (92.9 M<sup>2</sup>) to dry turf surfaces

*See label for complete usage information.*
