

HYDRATION

## Soil Surfactant Tablet

You work hard to provide great playing surfaces for your customers. Managing water in the root zone is important to your efforts and sometimes a cool-down is all that is needed. Vivax Tabs are a combination of four surfactant technologies, in an easy to use tablet, designed to manage water across a wide range of soil and turf types. It is ideal for spot applications on golf courses and athletic fields.

### What Makes it Better?

- Manages water across a wide range of soils and turf types
- Effective in programs that increase microbial populations
- Moves irrigation or rainwater off the playing surface and throughout the soil

### Features & Benefits

- Contains four surfactant technologies—effective across a wide range of conditions
- Reduces surface tension—less run-off and wasted water
- Provides greater soil solubility—improved turf quality and irrigation efficiency
- Resists microbial breakdown—ideal for use in programs that increase soil microbial populations
- 6-ounce tablet—easy to apply using most hose end applicators

#### USE RATES:

One 6-ounce (170 gram) tablet treats 12,000 to 18,000 sq. ft. Coverage may be affected by water temperature, water pressure and application technique

Please check with your Aquatrols distributor for available pack sizes.

#### APPLICATION INTERVAL:

Apply Vivax Tabs based on turf stress or the presence of localized dry spot (LDS)

*See label for complete usage information.*
