

MAGNAPLEX™

HYDRATION

Hydration & Infiltration

MagnaPlex is a combination of surfactants designed to increase volumetric water content and improve water infiltration. MagnaPlex combines the hydration of Magnus and the infiltration of Duplex in a convenient, easy-to-use formulation that does not require immediate post-application irrigation.

What Makes MagnaPlex Better?

- Improves infiltration through turf and thatch, while uniformly hydrating the root zone
- Effective as both a preventative and curative treatment
- Does not require immediate irrigation after application

Features & Benefits

- Dual surfactant technology to improve infiltration and promote uniform root zone hydration
- Versatile application across a wide range of soil types
- Improves turfgrass color, quality, and irrigation efficiency

USE RATES:

Spray Application

- Apply 5 ounces (0.15 Liters) of MagnaPlex in a minimum of 1 gallon of water per 1,000 sq. ft. (93 m²) of turfgrass.
- Apply 220 ounces (6.51 Liters) in a minimum of 44 gallons of water per acre (0.40 ha) of turfgrass.

Please check with your Aquatrols distributor for available pack sizes.

Injection Application

- Apply 32 ounces (0.95 Liters) in a sufficient water volume to treat one acre (0.40 ha).

See label for complete usage information.
