

ENHANCEMENT

Surfactant Plus AMS Adjuvant

Delux is a biodegradable activator surfactant and ammonium sulfate premix that enhances performance of glyphosate and certain postemergence herbicides.

Features & Benefits

- Ideal for use with Manage® and Image® for improved nutsedge control
- Enhances phenoxy control of tough broadleaf weeds like dandelions and thistles
- Activator surfactant provides quick and superior leaf surface coverage for maximum herbicide absorption
- Provides ammonium ions for improved herbicide uptake
- Buffers spray solution and prevents premature pesticide breakdown from alkaline hydrolysis
- Approved for aquatic use with RODEO®

USE RATES:

- Use 4–5 quarts per 100 gallons of spray solution for phenoxys.
- Use 5–10 quarts per 100 gallons of spray solution for Manage®, Image® and Glyphosate applications in 10–50 gallons of spray solution per acre.
- Use higher rates in corresponding higher water volumes

See label for complete usage information.
