

Commercial Sand Pigment

Replace XL is a unique pigment dispersion, formulated to impart a natural green color to sand used for filling divots and topdressing playing surfaces on golf courses and athletic fields.

Features & Benefits

- Concentrated for low use rate
- Easy to use and disperse, stable formulation
- Flexible packaging options
- Provides a natural turf color that helps mask divot injury

USE RATES:

- Apply 1 to 2 ounces of REPLACE XL to 100 pounds of sand
- Apply 1 to 2 pints of REPLACE XL to 1 ton (2,000 pounds) of sand

Please check with your Aquatrols distributor for available pack sizes.

See label for complete usage information.
