

- ✓ **RAPID RECOVERY FOR STRESSED TURF**
- ✓ **TREATS EXISTING LOCALIZED DRY SPOTS WET SPOTS
AND OTHER WATER RELATED PROBLEMS**

CONTAINS BENEFICIAL SUBSTANCES:**Soil Amending Guaranteed Analysis:**

Active Ingredient:	50.0%	Nonionic polyols
	5.0%	1,2-Propanediol
Inert Ingredient:	45.0%	Water

NOT RECOMMENDED FOR USE AS A FERTILIZER SUBSTITUTE

NOT A PLANT FOOD INGREDIENT.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 2.5 GALLONS (9.5 L)

Net Weight: 21.7 lb (9.84 Kg)
Density at 68°F = 8.671 lb/gal

Aqueduct® is a soil surfactant developed to provide turf managers with a rapid recovery tool to treat existing localized dry spots, wet spots, and other water related problems without concern of burning turf.

Directions for Use

WHAT IT DOES: Aqueduct treats and provides rapid recovery from existing localized dry spots, wet spots and other water related problems.

WHERE & WHEN TO USE: Aqueduct is recommended for use on fine turfgrasses such as those found on golf courses, athletic fields, residential and commercial and other highly maintained turf areas. Aqueduct can be safely applied in the spring, before the irrigation system is activated, as well as during the summer when environmental stress conditions may impact turf performance.

Turf (Golf Courses, Athletic Fields & Lawns Areas): Apply Aqueduct at 8 fl oz/1000 ft² (250 ml/100 m²) in 1 gallon (3.8 L) of water. Reapply at 4-8 fl oz/1000 ft² (125-250 ml/100 m²) in 1 gallon (3.8 L) of water on a weekly basis until problem is alleviated. Continue to use as needed at 4-8 fl oz/1000 ft² (125-250 ml/100 m²).

Following Topdress Applications: To treat areas following topdress applications, apply 4-8 oz of Aqueduct/1000 ft² (125-250 ml/100 m²) in 1 gallon (3.8 L) of water on a weekly basis as needed.

Sodding: After laying sod, apply at 8 fl oz/1000 ft² (250 ml/100 m²) in 2 gallons (7.6 L) of water. Under high stress situations, such as presence of localized dry spot (LDS), above average growing degree days (GDD), and/or low rainfall, an application of Aqueduct may be applied 7 days prior to the first application of other Aquatrols Soil Surfactants.

Aqueduct does not need to be watered in following application. Irrigate before next mowing or leave baskets off.

TANK MIXING: Aqueduct can be safely applied in a tank mix with a range of commonly used turf products and fertilizers at rates not exceeding 8 fl oz/1000 ft² per week. Turf managers may also select tank mixtures with other Aquatrols surfactants to achieve the desired turf conditions. NOTE: Tank mix combinations containing Aqueduct have not been tested on all varieties of every turfgrass species or under all possible growing conditions. If user is unfamiliar with the performance of Aqueduct in tank mixes under user's growing conditions, a limited area of turfgrass should be tested prior to large-scale application. The user should always exercise reasonable judgment and caution when using this and all other turf products. When turf managers are selecting a new tank mix combination with Aqueduct, Aquatrols recommends a jar test be conducted to determine compatibility prior to large volume tank mixing

Precautionary Statements/First Aid Measures in Case of Contact

Precautionary Statements

- Caution: May cause irritation. Do not get in eyes.
- Avoid breathing vapors or mists.
- Avoid using product in a manner as to directly, or through drift, expose workers or other persons.
- Always consult the safety data sheet for specific instructions.
- Applicators and other handlers must wear goggles or a facial splash shield; chemical resistant gloves, such as nitrile rubber ≥ 14 mils or neoprene rubber ≥ 14 mils; coveralls or long sleeved shirt and long pants; shoes plus socks.
- Keep out of reach of children.

First aid measures in case of contact

- **Eye:** do not rub eyes. Immediately flush eyes with large amounts of water for 15 minutes lifting the lower and upper lids. Seek medical attention if necessary.
- **Skin:** Remove contaminated clothing and immediately wash affected area with large amounts of water for at least 5 minutes. If irritation or redness persists, seek medical attention as needed.
- **Ingestion:** Give large amounts of water to drink. Seek medical attention if necessary. Induce vomiting only upon advice from a physician.
- **Inhalation:** Move individual to fresh air and check to ensure adequate respiration. Seek medical attention if necessary.

Applicators and other handlers should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove protective clothing and equipment after handling. Wash the outside of gloves before removing. Wash thoroughly and change into clean clothing.

For technical information and Safety Data Sheet (SDS), contact Aquatrols at 1-800-257-7797 or visit our website at www.aquatrols.com.
