General Use Guidelines

INITIAL APPLICATION:	IMPORTANT: Begin applications at least one month prior to the onset of stress conditions. Under high stress situations, such as presence of localized dry spot (LDS), above average growing degree days (GDD), and/or low rainfall, an application of Aqueduct® should be applied 7 days prior to the first application of Primer Select.
-----------------------------	---

Directions for Use

WHAT IT DOES:	Primer Select ensures uniform movement, distribution and availability of moisture in the rootzone and overcomes water repellency in soils.
WHERE & WHEN TO USE:	Primer Select is recommended for use on turfgrasses such as those found on golf courses, athletic fields, residential and commercial turf areas. Primer Select may be safely applied at any time during the growing season.
TANK MIXING:	Primer Select can be safely applied in a tank mix with a range of commonly used turf chemicals and fertilizers at rates not exceeding 4 fl oz/1000 ft ² . When turf managers are selecting a new tank mix combination with Primer Select, Aquatrols® recommends a jar test be conducted to determine compatibility prior to large volume tank mixing.
BEST PRACTICES:	More consistent results may be achieved with more regular applications. For best results , apply at least $\frac{1}{2}$ inch (7.5 mm) of irrigation after application. If runoff or puddling occur, water in using cycle/soak runs until $\frac{1}{2}$ inch (7.5 mm) is achieved. Irrigate before next mowing.
SEEDING:	To enhance stand establishment, use 4 fl oz/1000 ft ² rate and apply 2 weeks before seeding.

Sand-Based Rootzone Mixes & Native Sandy Soils

Rate	Application Frequency			
	14 Day *	21 Day	30 Day	6 Weeks **

Variables which impact performance and program application can be: soil type, presence of localized dry spot, quality of irrigation water, growing degree days, and rainfall levels.

Recommendations assume **season long** program applications.
* For best results, make initial application of 4 fl oz/1000 ft², then follow with 2 fl oz/1000 ft² every 14 days after.

** This application should be applied alone.
