

For Natural Blue Lakes and Ponds

True Blue is a dark aqua blue, odorless, nontoxic liquid formulated to impart an attractive blue coloring to natural and man-made ponds, water hazards, lakes and fountains. It is composed of both blue and yellow dyes that reduce sunlight penetration. Designed to turn water an environmentally pleasing, natural blue without producing an artificial appearance, True Blue aids in beautifying golf courses, parks, corporate campuses, campgrounds, retention ponds, and farm ponds. True Blue is safe and nontoxic to fish, birds, and animals.

TRUE BLUE™
EZ SOLUPAK

ENHANCEMENT

For Natural Beauty, Use True Blue

Lakes and ponds look best when they are clean, clear, and naturally pleasing. True Blue lake and pond dye is a proprietary blend of water-soluble dyes formulated to reduce sunlight penetration and impart an attractive blue coloring to natural or man-made ponds, water hazards, lakes, and fountains. True Blue is safe and non-toxic to fish, birds, and animals. True Blue EZ SoluPaks make application even easier, with pre-measured individual dosage packs in a convenient water-soluble packaging.
