

ENHANCEMENT

Activator Adjuvant

Compound is a low-use-rate, low odor activator adjuvant blend designed to maximize the performance of tank mixes applied to turf and ornamentals. Compound effectively buffers spray solutions, maximizes spread, enhances plant cuticle and cell wall penetration and reduces the off-target movement of tank mix partners.

Features & Benefits

- Reduces and maintains the pH of spray solutions to protect products from premature chemical breakdown, resulting in more consistent and effective performance
- Reduces spray fines and off-target movement, which protects the environment and reduces liability
- Improves leaf blade coverage for more consistent and effective levels of performance
- Increases product penetration across leaf surface barriers and through plant cell walls to provide faster knockdown and control

USE RATES:

- 1-3 pints (473 mL–1.42 L) per 100 gallons of spray solution (0.125%–0.375% v/v)
- 1 pint (473 mL) per 100 gallons recommended for most spray applications

See label for complete usage information.
