

HYDRATION

## Unique Formulation to Maintain Turf Quality & Consistency

Zipline Pro is your solution for healthier turf, improved hydration, and exceptional performance under diverse conditions.

Zipline® Pro features a dual-action surfactant blend specifically designed for turf managers looking to get the most out of their playing surfaces while maintaining turf quality and consistency. This advanced formulation soil surfactant from Aquatrols has been successfully awarded EU FPR certification. It contains a blend of two high performance proven chemistries to aid with water management. The inclusion of cold pressed seaweed provides numerous plant health benefits, thanks to its rich composition of nutrients and bioactive compounds that enhance the soil microbiome. Zipline Pro delivers consistent results on all turf types.

### Key Benefits:

- Balanced hydration and infiltration
- Proven stress tolerance and turf quality consistency
- Improved nutrient availability to support healthy plant growth
- Enhanced root development to help access water more efficiently
- Provides consistent playing surfaces

### Application Recommendations:

- Apply monthly @ 6 – 26 L/Ha
- The higher the rate, the greater the consistency and longevity, and the more moisture that is held
- Apply through conventional spray equipment in a minimum of 200L of water per hectare

### PACKAGING:

2 x 10L cans

### USE RATES:

6 - 26 L/Ha monthly or as needed

## World Class Surfactant with Immediate Plant Health Benefits

Zipline Pro is a premium dual-action surfactant blend, engineered to deliver visible results and unparalleled control for turf managers. Its advanced formulation improves water infiltration and balanced hydration, featuring a combination of linear and etherified block copolymer surfactants. These proven soil chemistries effectively break surface tension, allowing moisture to penetrate deep into the soil profile and ensure consistent hydration.

## Enhanced Plant Health with Seaweed Extract

Now fortified with a high-quality cold pressed seaweed component, Zipline Pro takes surfactant performance to the next level. Seaweed is rich in nutrients and bioactive compounds, which help maximise turf health and reduce turf stress. When applied to turfgrass, this natural, environmentally sustainable component promotes turfgrass resilience and vitality.

## A Unique Dual Benefit Approach

Zipline Pro stands out by combining the benefits of a surfactant with a plant health element. This innovative synergy not only enhances water availability within the soil profile but also delivers a wide range of plant beneficial elements, ensuring plants have access to all the resources required to perform optimally.

## Flexible Application for all Turf Types

Designed with flexibility in mind, Zipline Pro offers adaptable application rates to suit various turf management goals. This gives turf managers precise control, enabling water management optimisation across all types of sports and amenity turf surfaces.

Zipline Pro Facts	
<b>WHAT IT DOES:</b>	Zipline Pro improves water infiltration from the surface to depth in the rootzone at the same time as improving plant health.
<b>HOW TO APPLY:</b>	<ul style="list-style-type: none"><li>Apply Zipline Pro through conventional spray equipment in a minimum of 200 L per hectare or 20 ml per m<sup>2</sup>.</li><li>Zipline Pro is safe for turfgrass and does not need to be watered in immediately after application. However, it should be watered in sufficiently to deliver Zipline Pro to a depth of 75-100 mm. Zipline Pro should be watered in thoroughly the evening following application.</li><li>Zipline Pro has excellent tank mix compatibility.</li></ul>
<b>APPLICATION RATES:</b>	Designed for flexible rates of application. Apply 6 - 26 L/Ha.
<b>WHERE TO USE:</b>	Safe to use on all turf types, including all sport and amenity turf surfaces.
