Directions for Use

GENERAL INFORMATION: The addition of adjuvants to some tank mix combinations may cause phytotoxicity to the foliage and/or fruit of desirable crops. Before using MICROYL, the applicator or crops advisor must have experience with the tank mix combination, including MICROYL, or must have conducted a phytotoxicity test. Do not use this product in a manner inconsistent with labeling. MICROYL increases the activity of many pesticides; therefore, care must be taken when treating sensitive crops during periods of drought stress, high temperatures or high humidity.

WHERE TO USE: FOR USE WITH PESTICIDES REGISTERED FOR GOLF COURSES, SOD FARMS, RECREATIONAL, COMMERCIAL AND RESIDENTIAL TURFGRASS AREAS, AS WELL AS SPORTS GRASS PLAYING SURFACES AND NON-CROPLAND.

USE RATES: BY VOLUME: Apply at 0.375–0.5% v/v (3–4 pints of MICROYL per 100 gallons of spray solution).
BY ACRE: Apply at 10–12 ounces per acre in a volume of water sufficient to provide coverage.

MIXING: In the absence of specific mixing instructions found on the pesticide label, fill the spray tank with at least 50% of the desired finished carrier volume. When premixing in a mixing vessel or inductor, fill with at least 20% of the desired finished carrier volume. While the carrier is agitating, add tank mix ingredients in the following order:

1. Compatibility agent and/or antifoam, if needed
2. AMS, dry formulations (WP, DF, WDG, SP), and dry drift retardants
3. Dry soluble and suspension fertilizers / micronutrients

7. Solutions and soluble liquids (S or SL)
8. Liquid micronutrients and fertilizers
9. Water conditioners and other adjuvants (COC, HSOC, MSO, NIS)
